

Case Study

The Red Lion Bar and Restaurant, Stockport

Part of the Robinsons chain, The Red Lion Bar and Restaurant in Stockport serves quality British food, complemented by an extensive wine list and cask ales.

The customer:

Specialising in the leisure industry, Innex Design Ltd provides a first class, tailor made design service to its clients, which vary from hotels, pubs and nightclubs to commercial, educational and housing projects. The company prides itself on delivering a finished project that meets brief and expectations, on time and on budget.

**Richard
Burbidge**

FUSION® Commercial is one of the most attractive systems I've specified for some time and we're very pleased with the finished result.

The Project

The Red Lion underwent a full refurbishment, specified by Innex Design Ltd. The project saw the pub divided into nine areas, each with its own atmosphere and purpose.

The Balustrade

FUSION® Commercial stair balustrade was installed throughout the pub to provide support for customers on small steps and create attractive barriers between various areas of the restaurant and bar. The modern mix of brushed nickel balusters and connectors with minimalist oak handrails makes FUSION® ideal for contemporary settings.

"FUSION® Commercial is one of the most attractive systems I've specified for some time and we're very pleased with the finished result. The Red Lion has been entered for a prestigious Pub Design Award, which is testament to the overall interior design scheme and the quality and finish of the products installed.

"As with any aesthetically pleasing product, functionality must not be overlooked. The Richard Burbidge system is independently strength tested in line with UK Building Regulations, providing an important safety barrier for staff and customers, so the product not only looks great but it's also fit for purpose."

Product
FUSION® Commercial

Project Detail
FUSION® Commercial balustrade was adapted for use on a shallow access ramp, covering approximately 6m. FUSION® handrail and the necessary connectors were also used across various dividers throughout the restaurant.

FUSION® Commercial indoor balustrade

- Pre-finished round oak rails and newels
- Pre-cut metal balusters and connectors in a modern Brushed Nickel finish
- Suitable for stair pitches of 33°- 42°
- Suitable for handrail heights of 900mm for staircases and 1100mm for landings
- Suitable for use on timber, concrete or metal staircases
- Compliant with UK Building Regulations
- Tested for public stairs requiring loadings of 0.74kN/m
- Easy to install, delivering labour, time and cost savings
- Available ex-stock
