

Case Study

St Mellion International Resort, Cornwall

Set in 450 acres of stunning Cornish countryside, St Mellion International Resort offers a fresh, unexpected alternative to more traditional hotel and resort accommodation in the West Country.

The customer:

St Mellion started life as a small 9-hole golf course in the early 1970s and now their 18-hole championship course will host the English Open in 2011.

 **Richard
Burbidge**

The glass panel system from Richard Burbidge complements the hotel's modern exterior, whilst the product's quality ensures it will remain looking good for years to come.

The Project

Specified by architects Pearn & Proctor, the resort has undergone a £20million refurbishment programme. The complex now offers a contemporary 4-star hotel, an impressive leisure facility with 3 pools and a spa, and a selection of restaurants. The resort also boasts two championship golf courses, one of which was the UK's first Jack Nicklaus designed Signature Course.

The Balustrade

FUSION® Commercial outdoor balustrade with glass panels was installed on all guest balconies within the three-storey hotel. Its modern mix of metal newels and hardwood handrails makes it ideal for contemporary settings, whilst the large glass infill panels maximise the sense of space on the balconies and allow an unobstructed view of the 18th fairway.

“We are privileged to be hosting the English Open, so it was crucial that all work was completed on time and more importantly, to a high standard. The glass panel system from Richard Burbidge complements the hotel's modern exterior, whilst the product's quality ensures it will remain looking good for years to come.

“In addition, the safety of our guests is paramount, so the balustrade system needed to be strength tested in line with Building Regulations. FUSION® Commercial meets the relevant requirements, providing peace of mind for the hotel and its guests.”

Thierry Jung, Hotel Manager at St Mellion International Resort

Project Detail
Each straight span was installed with 8m of balustrade, incorporating 8 large glass panels. The system was also required on 2 curved balconies, each measuring approximately 15m and incorporating 15 glass panels.

FUSION® Commercial outdoor balustrade

- Pre-finished round hardwood rails and pre-cut metal newels
- Available with timber balusters, slatted timber panels or glass panels
- Pre-cut glass panels available in two sizes
- Suitable for use on timber decking and concrete surfaces
- Compliant with UK Building Regulations
- Tested for public balconies requiring loadings of 1.5kN/m
- Bracket fixings and newel post support bar add significant strength
- Easy to install, delivering labour, time and cost savings
- Available ex-stock
