

Environmental Policy

Archwood Ltd T/A Richard Burbidge is committed to reducing the environmental impacts caused by its operations as a manufacturer and supplier of predominantly timber based products for the building and home improvement sector, and to the prevention of pollution.

The company has implemented an Environmental Management System to meet the requirements of ISO 14001. This will establish a baseline performance level and set standards and targets for continuous improvement.

We are committed to compliance with all legislation and regulations of an environmental nature and legislative requirements will be continually reviewed as they may be introduced.

The company has a management system to set specific objectives and targets regarding environmental issues. These are fully detailed in our environmental manual which will be reviewed and amended as required.

A full set of procedures has been established and will be maintained to ensure that the company's activities are carried out with due consideration to their environmental impact.

This policy is available to the public on request.
